

Greetings all.

Hilary and I are to step aside handing over the reins at McHort to the next generation. Chris and Kate Tubby will, from 1st June, take over the day-to-day operations of McHort. Donald will continue to assist with technical support, market and product development. It will be business as usual once we have done a stock take and set up a new, improved office administration system. We will need time and your patience to do this! This will cause despatch disruption for the week beginning 1st June so if you could please place any urgent orders before then it would be much appreciated.

We are confident that this injection of youth and a modernized office system whilst retaining all our proven products and friendly efficient service will ensure both continuity and a bright, long term future for McHort.

Cheers and good growing.
