

McHort TOPDRESS FERTILISER RANGE

BEST RANGE, BEST PERFORMANCE, BEST VALUE BY FAR

SPRING & MORE

McFert Top 24 24+3+6.6+Te 8-10wk

A fast acting, less temperature sensitive formulation containing Methyl urea and soluble Nitrogen in equal parts. Once watered in, the product sticks to the growing media surface and resists loss if the pot blows over. Elevated Iron content for green-up and superior technology, The Wolf Trax, trace element package ensures uniform distribution of the trace elements right to the bottom of the bag.

SUMMER

Apex 'Enrich' Super Iron Topdress 21+2.1+4.9+Te 4-5 month

A triple blend of soluble, slow release & encapsulated controlled release fertiliser. For sustained plant growth and leaf colour that lasts for up to 18 weeks, even in the heat, from a single application. Contains a full range of trace elements and elevated Iron for deep green foliage colour. Used with great success for nearly 20 years in New Zealand. Fantastic value for money!

SPRING & EARLY SUMMER

Apex 'Enrich' Full Season Topdress 22+2.6+8.3+Te 6-7month

A blend of release technologies for a staged release of nutrients. Delivers a quick response with sustained performance. One application in Spring will feed for the whole growing season. Suitable for the widest range of plant species. Formulated with elevated Iron for greening-up foliage. Especially suited for feeding advanced grade plant stock.

ALL YEAR ROUND IN PROPAGATION

Apex Mini Topdress 18+6+12 3-4 month

A homogeneous mini sized prill for topdressing cell trays, root trainers or GOL pots in carrying trays ensuring uniform distribution, even on a small top surface target area. Will 'green-up' and rejuvenate tired propagation material, boosting vigour for faster post potting establishment. Safe over the top of the crop, apply over dry foliage and brush off any lodged material before irrigating in.

We recommend application using our **Spred-Rite G** gravity fed top dressing tool. Ask for details.
