

Greetings all.

Whilst we are grateful that business is booming, it is not without its challenges, both now and for the foreseeable future.

We are experiencing significant delays on many imported products; some are simply not even being produced! Yes, it's all Covid 19 related.

Costs are on the rise as a consequence and, whilst we apologise for that, it is certainly beyond our control.

May we suggest you put some thought to future needs and order early to avoid disappointment.

Long range weather forecasts suggest prolonged periods of moist, humid and warm conditions. Bugs and fungus just thrive in such weather. Are you ready to protect your plants from attack?

We can help with that, without resorting to chemical poisons. Call us.

Cheers and good growing.

McPHERSON HORTICULTURE

REDUCE, REUSE, REPAIR, RECYCLE

THE POT YOU CHOOSE MATTERS

The extensive pot and tub range from McHort is made using recycled materials.

That's good, but it gets better!

Our pots and tubs have an incredibly long service life too. They are proven to be really durable, UV resistant, don't fade, or go brittle.

We have sizes from 2 Lt 1.5cm to 160 Lt 71cm and some innovative designs too!

PLANT SOAP PS1 suffocates them. No poison, non toxic, odourless and no residues.
WHY HAVEN'T YOU TRIED IT?

We even pickup and refill your 20 Lt Jerry can

FUNGUS GNAT

Causing mayhem in your propagation

HEALTHY ROOTS are the foundations to good plants

HOW GOOD ARE THE ROOTS ON YOUR PLANTS?

Go on, slip off the pot or bag you grow in and take a closer look. You can learn a lot! Check out how much of the pot or bag is colonised by roots. Are they white and firm? Blackened, soft or water soaked roots may indicate disease. Are there roots right to the bottom of the pot or bag? If not, it could point to drainage or potting mix structure issues.
