

Greetings all.

If you think plant stock is short now, just wait until this time next year! Advanced grade stock will be especially hard to find and, as a consequence, will command higher prices than ever before.

Whatever grade of plant you produce, the foundation of a superior plant is its roots. Root health is critical and the pot you choose to grow in makes all the difference. Our innovative Pro Pot, Pro Pot Square and Eracle pots are the choice for plant root health and hygiene. We have a size to suit your crop and they are reusable too!

Of course plant health goes beyond the roots, so we have a Top dress fertiliser deal to help you maintain your plant vigour and colour. McFert Top 24 is an established favourite and great value too! Check out our price! Boost your crop health, even more, with our *TrichoProtection* Combo packs. McHort have pioneered and championed these biological disease suppression alternatives for over two decades. They work!

We are passionate about helping you use as few chemicals as possible. For the sake of the environment and us all, please do give them a go! Call us for a chat today.

Cheers and good growing.

FOR TUBS AND POTS

PLANT SOAP SPRAY IT, NOW!

FOR PEST SUPPRESSION –

Simply suffocates a wide range of biting & sucking insects right there on your plants. Aphid, Whitefly, mites, scale, Mealy bug and many more. Eggs, juveniles and adults. Non toxic, gentle on pollinators and pest predators. Better for us and the environment.

DE-WATERING EFFECT –

Plant Soap is a natural surfactant which, when sprayed on to the leaves & stems, prevents water from settling. This persistent effect denies wind blown or water borne fungal spores the conditions they need to germinate and attack your plants. It's all good; do try it !
