

TOP DRESSING ADVANCED CONTAINER STOCK

using APEX Nursery fertiliser

For once per season feeding use:

APEX 'Enrich' Full Season 22+2.6+8.3+Te 6-7 month
with

APEX Extra Special 'K' 2+0+31 6-7month

In a 4:1 (by volume) pre-application blend

@ 3gram/litre of pot volume for the first 30ltr

+2gram/ltr. for each additional litre to 80Ltr.

+0.5 gram/ltr. for every extra litre of pot volume past 80ltr

(e.g. 60 Ltr pot use 150g. 160Ltr use 230g.

**PRODUCES SOLID, STEADY GROWTH WITH SUPER
STEM CALIPER.**

We strongly recommend
applying Gypsum and
Kieserite for continuous
Calcium and Magnesium supply
to all stock that has be in the same pot
for more than 12 months.

Place in the dripper wet zone.

Avoid placing topdress materials hard against the plant stem.
