

APEX® Nursery fertilisers

A Higher Standard in Plant Nutrition

Fertiliser recommendation for

TOPDRESS APPLICATION

PALMS IN LARGE CONTAINERS

Apex 'Enrich' Super Iron Topdress 21+2.1+4.9+Te
4-5 month

@ 1.0-2.0g/litre of pot volume
NOVEMBER to MARCH

or

Apex 'Empower' Cool Weather Special 21+3.0+4.9+Te
3 month

@ 1.0-2.0g/litre of pot volume
APRIL to OCTOBER

For strong growth,

High in Iron for deep green foliage

Produces superb fronds with thick leaves which show excellent disease resistance

Applying Gypsum and Kieserite @ 1g/litre as a topdress may also be beneficial. A pre-mix of the selected APEX product with Gypsum and Kieserite can be applied at the same time there by providing a continuity of Calcium and Magnesium as well as the usual NPK and trace elements.

N.B. ENSURE THAT THE FERTILISER DOES NOT REST AGAINST THE STEM OF YOUR PALM.

ATTEMPT TO SPREAD THE FERTILISER OVER THE WHOLE POT SURFACE
